ABOUT THIS PUBLICATION

The Monthly Summary of Statistics, Australia contains, at the time of printing, the latest available data on a wide range of topics. It provides a comprehensive overview of the economic and social conditions in Australia.

In the contents pages, tables of series containing seasonally adjusted indicators are marked with a dagger (†).

As well as being adjusted for normal seasonal factors, some of the statistical series included in the *Monthly Summary* of Statistics, Australia have been adjusted for the effects of calendar variation: namely, 'trading-day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in a month) and the influence of movable holidays, for example Easter and Australia Day.

Trend estimates are shown for some series in which the seasonally adjusted series have been smoothed to reduce the impact of the irregular component.

SYMBOLS AND OTHER USAGES

The following is an explanation of the symbols used in this publication:

- n.a. not available
- n.e.c. not elsewhere classified
- n.e.s. not elsewhere stated
- n.y.a. not yet available
 - . not applicable
 - n.p. not available for publication unless otherwise indicated but included in totals where applicable
 - p preliminary figure or series may be subject to revision
 - r figures or series revised since previous issue
 - nil or rounded to zero
- --- break in continuity of series (where drawn across a column between two consecutive figures)
 - * subject to sampling variability too high for most practical purposes.

Yearly periods shown as, for example 1992, refer to the year ended 31 December 1992, those shown as, for example 1991–92, refer to the year ended 30 June 1992.

Values are shown in Australian dollars (\$).

Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Also, minor revisions to figures already published are not applied for periods more than one quarter prior to the quarter of publication. Hence, small discrepancies may occur between annual data and totals derived by summing the data for each of the four quarters.

Most of the original and all of the seasonally adjusted series are subject to revision.

FOR MORE INFORMATION

The ABS has a far wider range of information on Australia than that contained in this publication. Information is available in the form of regular publications, electronic data services, special tables and from investigations of published and unpublished data.

Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publications Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

For further information about ABS statistics and services please contact any of the ABS offices (see the back of this publication).

⁽a) The estimates relate to all persons aged 15 and over except members of the permanent defence forces, certain diplomatic personnel of overseas governments, overseas residents in Australia and members of non-Australian defence forces in Australia. For definitions see Explanatory Notes in the latest issue of the monthly publication The Labour Force, Australia (6203.0). (b) Original labour force estimates are now based on population estimates obtained from the 1991 Census of Population and Housing. (c) The number of unemployed in each group as a percentage of the labour force in the same group. (d) The labour force in each group as a percentage of the civilian population aged 15 and over in the same group.

⁽a) Includes natural gas. (b) Total electricity generated by establishments predominantly engaged in the generation of electricity. (c) Includes ingots, puddled bars, pilings, blocks or lumps and steel in molten state. There is a break in the series as statistics after July 1991 exclude a small proportion of total production due to the withdrawal of consent for the ABS to release the information. (d) From rolling and forging of iron and steel (primary mills output). (e) For structural purposes.

⁽a) All figures are \$A values at end of period shown. Changes in the \$A value of holdings of official reserve assets in any period reflect both valuation effects and transactions. The latter include sales and purchases (including swaps) of, and carnings on, foreign exchange by the Reserve Bank of Australia and certain transactions with official institutions overseas. The foreign entrency value of overseas assets is based, where applicable, on market quotations; accrued interest is normally taken into account. Conversion into \$A equivalent is based on end-month rates of exchange. (b) Gold is valued at the \$A equivalent of the 3 p.m. price fix in the London gold market on the last business day of the month. See also table on Official Reserve Assets and Exchange Rates in the Balance of Payments section, page 47.

(a) The figures in this table are derived from returns submitted by banks authorised under the Banking Act 1959 together with similar returns voluntarily submitted by the State banks; they exclude the Reserve Bank. Figures prior to January 1989 exclude Commonwealth Development Bank and Australian Resources Development Bank. The table shows from January 1990 liabilities and assets recorded on banks' Australian books; prior to this date, it shows liabilities and assets within Australia. (b) All certificates of deposits issued by banks have been shown as resident deposits. (c) Includes issues of term subordinated debt, loan capital and similar instruments. (d) Excludes shareholders' funds. (e) Break in series due to establishment of new bank(s), which may have caused the switching of assets and liabilities from NBFIs to banks. (f) Break in series associated with the integration of a (former savings bank) subsidiary into its parent bank. (g) Break in series due to the transfer of NBFI business to a bank. (h) Break in searies due to reclassification of 'all other \$A liabilities' to 'other borrowings' by one bank (i) Break in series due to a change in accounting procedures by a bank.

⁽a) Includes government-owned vehicles except those belonging to the defence services. Excludes plant and equipment, caravans and traiters. Data from December 1990 in this table is based on the System of Vehicle Identification Numbers (VIN) introduced by motor vehicles authorities from July 1990 onwards. The system allows more accurate identification and classification of newly registered vehicles and as a result there is a reduction in the level of new vehicle registrations, through better identification of duplicate registrations and those registered previously.

⁽a) From September quarter 1992, caravan park sites etc. permanently reserved but only causally occupied by their tenants have been recorded continuously as site nights occupied irrespective of whether the tenants of individual sites were in residence on any particular night. Occupancy measures from September quarter 1992 are not therefore comparable with those from previous quarters.
